Two Hearts, One Car.

With advanced powertrain technologies, such as electrification, we aim to provide you with an unrivalled driving experience. In fact, we've focused on electrification and plug-in hybrid technology for more than 40 years. This experience together with advanced research put Volvo Cars in the forefront of technology, and our latest powertrain advancement – the high-performance T8 Twin Engine AWD with plug-in hybrid technology – allows you to enjoy an involving drive as well as cutting CO₂ emissions. With 407hp the combination of a four-cylinder petrol engine and powerful electric motor offers power and performance of a much larger engine, but use much less fuel. The T8 Twin Engine AWD gives you the best of both worlds. Power without compromise.
